N. McCurdy, Augusta, Ark. THE New York Evening Post of February 25th says: The question is frequently asked whether the value of cotton has not been sufficiently reduced to encourage speculative pur-chases. No doubt prices are low, and unforeseen events might cause a temporary if not a permanent advance. However, in the regular course of events it is to be considered that the article is at least quite as cheap in Liverpool as in the lowest of our Southern markets, that the supply of American and Indian cotton will be abundant, that business that political home affairs in Great Britain are in a worse state than ever. Under such circumstances it cannot be a matter of surprise that there is hardly any speculative demand. As far as Liverppol is con-cerned it is to be hoped that the de-mand for consumption will be large enough to support present prices. Occasionally, weeks of large buying may cause a temporary start in the Liverpool market, but the time for a durable improvement does not seem to have arrived yet.

WE learn from the monthly circular of the Manhattan Savings Bank and Trust Company, issued yesterday: "While it will be noticed that the ad-vance in values of local securities has been general, the greatest apprecia-tion has been made by our municipal —Taxing District—bonds, and this is really the most gratifying feature in the case. It has taken some time to convince some of our own people of the almost unsurpassed situation of Memphis as a distributing point; but now that the fact seems established, beyond doubt, that Memphis has really just begun to wake up from her thargy; when we see o after another coming this way; when all reputable enterprises flour-ish; when new buildings begin to go up; when the volume of bank clearsteadily increases; foreign capital eagerly seeks our doors; it will be seen that the appreciation in our securities is not base-The single exception to the general advance in dividend-paying stocks appears to be in the case of Memphis Gas Light stock, which is 2½ cents lower than at the corresponding time last year, but which had sold 3½ cents higher than last year during the past two weeks. The decline has been brought about by the threat of one or two ex-holders of the stock to organize a competing company. While the construction of a new company would doubtless reduce the revenues of the Memphis Gas Light Company, we doubt very much that the agitation will result in anything but a reduction in the price of gas, and, collaterally, a reduction in the rate of dividend.
